Istanbul, Türkiye (UTC+3) · Full overlap with CET/CEST · Available via Employer of Record or B2B contract — no visa sponsorship required

SUMMARY

Full-stack software engineer with 4.5+ years of production experience across proptech, fintech, and media, building and shipping products with React, Next.js, Node.js, NestJS, .NET, and React Native. Nearly three years in workplace experience technology, first building the Leesman platform and later returning to migrate it into HqO after the acquisition. Comfortable across the stack: TypeScript on the frontend, REST APIs and services on the backend, and AWS (Lambda, S3, SQS, RDS) in production. Has designed and shipped a production B2B SaaS single-handedly across mobile, backend, and infrastructure. Daily user of AI tooling in real delivery work, including internal tools that cut multi-hour workflows to minutes. Experienced working with distributed teams across the UK, Germany, Poland, Slovakia, Australia, and the US.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Python, Swift
Frontend: React, Next.js, React Native, Expo, SwiftUI
Backend: Node.js, NestJS, ExpressJS, .NET, REST APIs, GraphQL
Cloud & DevOps: AWS (Lambda, S3, SQS, RDS, Secrets Manager), Docker, Cloudflare Tunnel, Vercel, Git, CI/CD
Data: PostgreSQL, SQL Server, MongoDB
State & Data Fetching: Redux, Redux Toolkit, Zustand, TanStack Query
Testing: Vitest, Jest, React Testing Library
AI Tooling: Claude Code, Cursor, OpenAI Codex, Gemini
Collaboration: Figma, Jira, Confluence, Agile / Scrum

PROFESSIONAL EXPERIENCE

HqO / Leesman (via ElephantApps) Remote — Boston, US & London, UK
Workplace experience and analytics platform for landlords and enterprise tenants. HqO acquired Leesman in 2024.

Software Engineer Dec 2025 – Present
Frontend Developer Dec 2022 – Jun 2024

- Returned to the product after HqO's acquisition of Leesman to work on migrating the platform I had previously helped build — nearly three years in the same domain across both engagements.
- Built full-stack features across HqO's and Leesman's platforms using React, Next.js, Node.js, and NestJS.
- Delivered features in the events domain used by both tenants and landlords across more than 1,500 properties.
- Built AI-powered internal tooling that automated report generation for the Leesman team, reducing a 4–7 hour manual workflow to under 5 minutes.
- Cut load times on the main reporting dashboard by 50% through code splitting, memoisation, and query optimisation.
- Worked asynchronously across four time zones with colleagues and customers in the UK, Poland, Slovakia, and the US, owning client requests end to end from clarification through delivery.

NonPublic

Remote — Sydney, AU

Private markets and pre-IPO investment platform, ASIC-regulated (Australian Financial Services Licence). Six-month engagement to deliver the investor mobile application and company web presence.

Frontend Developer

May 2025 – Nov 2025

- Built and maintained customer-facing and back-office applications for a regulated investment platform, working with a distributed team across Australia and Germany.
- Developed onboarding and KYC-adjacent flows in React, React Native, TypeScript, TanStack Query, and SASS.
- Shipped an investor-facing mobile application with React Native.
- Delivered the company marketing site with Next.js, TypeScript, SASS, and Sanity CMS, achieving a Lighthouse performance score of 100.

Fibabanka (via Veriport)

Istanbul, Türkiye

Turkish commercial bank; the platform is used daily across all branches.

Frontend Developer

Jul 2024 – May 2025

- Migrated core banking screens (accounting, customer services, EFT) from a legacy Java/XML stack to React, Redux, and a customised Material UI theme, rolled out across all branches.
- Reduced screen render times by roughly 50% compared to the legacy XML-based implementation.
- Analysed and documented legacy Java/XML screen behaviour in Confluence to de-risk the migration.
- Built and documented reusable components for the bank's internal UI library using Storybook and JSDoc.

Digiturk / beIN Media Group

Istanbul, Türkiye

Pay-TV and sports broadcasting group.

Frontend Developer

Feb 2022 – Dec 2022

- Developed internal web applications for R&D projects using React, Redux, and Redux Saga.
- Resolved production issues raised by call center teams through Jira.
- Worked with Axios, Bootstrap, Styled Components, and Emotion across the UI layer.

EDUCATION

Bahçeşehir University — M.A., Marketing

Feb 2024 – Jun 2025

Istanbul Kültür University — B.Sc., Industrial Engineering

Sep 2016 – Mar 2022

LANGUAGES

Turkish — Native · English — C1, working language for 4 years · German — A2
